The brain is an organ that serves as the center of the nervous system in all vertebrate and most invertebrate animals. The brain is located in the head, usually close to the sensory organs for senses such as vision. The brain is the most complex organ in a vertebrate's body. In a human, the cerebral cortex contains approximately 10–20 billion neurons, and the estimated number of neurons in ...

Brain - Wikipedia

Deep learning (also known as deep structured learning or hierarchical learning) is part of a broader family of machine learning methods based on learning data representations, as opposed to task-specific algorithms. Learning can be supervised, semi-supervised or unsupervised.. Deep learning architectures such as deep neural networks, deep belief networks and recurrent neural networks have been ...

Deep learning - Wikipedia

There are 100,000 miles of blood vessels in the brain. The distance around the equator is 24,900 miles.

Your Brain Map: Learning Strategies for Everyone

As the popular press has discovered, people have a keen appetite for research information about how the brain works and how thought processes develop (Newsweek, 1996, 1997; Time, 1997a, b). Interest runs particularly high in stories about the neuro-development of babies and children and the effect of early experiences on learning.
