Neisseria gonorrhoeae Antimicrobial Susceptibility Surveillance " The Gonococcal Isolate Surveillance Project, 27 Sites, United States, 2014

***Neisseria gonorrhoeae* Antimicrobial Susceptibility**

The tested pathogen was indicated as *Rhodotorula glutinis/mucilaginosa* according to the Vitek automated identification system (bioMérieux, France) using Yeast Biochemical Card 2 (YCB). The species identification of the strains was performed at the Public Health Institution of Turkey-Mycology Reference Laboratory (PHIT-MRL).

A Case of Onychomycosis Caused by *Rhodotorula glutinis*

April 2014"Dr. Nayar, professor of pathology at Northwestern University Feinberg School of Medicine in Chicago, is co-chair of the Cytopathology Education and Technology Consortium, president of the American Society of Cytopathology, and a member of the CAP Cytopathology Committee. She spoke with CAP TODAY recently about the FDA advisory committee's recommendation on cervical cancer screening.

HPV primary screening for cervical cancer"an interview

Even though IQCP is an optional program, says Kerstin Halverson, BA, MS, point-of-care coordinator at Children's Hospitals of Minnesota, the alternative"meeting the minimum QC requirements set by CLIA "is often impractical.

IQCP without agony at the point of care " CAP TODAY

Contributing editor Dr. Pereira continues part 2 of a series on the ISO standards applicable to medical laboratories. The ISO 15189 is widely popular for laboratories, but many aspects are confusing, vague, and misunderstood.

INTRODUCTION. Antiphospholipid syndrome (APS) is characterized by venous or arterial thrombosis and/or an adverse pregnancy outcome in the presence of persistent laboratory evidence of antiphospholipid antibodies (aPL). APS occurs either as a primary condition or in the setting of an underlying disease, usually

systemic lupus erythematosus (SLE).

Non-tuberculous mycobacteria (NTM) are ubiquitous environmental organisms that can cause chronic pulmonary infection, particularly in individuals with pre-existing inflammatory lung disease such as cystic fibrosis (CF). Pulmonary disease caused by NTM has emerged as a major threat to the health of individuals with CF but remains difficult to diagnose and problematic to treat.

US Cystic Fibrosis Foundation and European Cystic Fibrosis

Skin and skin-structure infections (hereafter referred to as skin infections) are common conditions among patients seeking medical care in the United States, 1,2 accounting for approximately 14.2 ...
