Defining Homeland Security: Analysis and Congressional

This document is part of the process for improving the quality of care in family planning. Specifically, it is one of two evidence-based cornerstones (guidance documents) of the World Health Organizationâ€™s (WHOâ€™s) initiative to develop and implement family planning guidelines for national programmes.

Relevance is the concept of one topic being connected to another topic in a way that makes it useful to consider the second topic when considering the first. The concept of relevance is studied in many different fields, including cognitive sciences, logic, and library and information science. Most fundamentally, however, it is studied in epistemology (the theory of knowledge).

Race and health refers to how being identified with a specific race influences health. Race is a complex concept that changes across time and space and that depends on both self-identification and social

recognition. In the study of race and health, scientists organize people in racial categories depending on different factors such as: phenotype, ancestry, social identity, genetic makeup and ...
