dissociation in traumatized children pdf

Dissociation is any of a wide array of experiences from mild detachment from immediate surroundings to more severe detachment from physical and emotional experiences. The major characteristic of all dissociative phenomena involves a detachment from reality, rather than a loss of reality as in psychosis.. Dissociation is commonly displayed on a continuum.

A Letter from Jack Hirose . Dear Colleague, I am pleased to announce that our annual Canadian Mental Health Summit Conference: Advanced Interventions and Strategies for Frontline Professionals will be hosted on November 20, 21 and 22, 2019 in the beautiful city of Calgary, Alberta. This conference will bring together 12 internationally renown experts for 15 full day workshop options.

The Canadian Mental Health Summit: Advanced Interventions

INTRODUCTION. Violent crime is a growing issue that occurs nationally and globally. Every day, individuals are abused and victimized. As healers and caregivers, nurses come into contact with individuals who are victims of trauma—whether a motor vehicle accident, sexual assault, intimate partner violence, gunshots, psychological abuse, or pediatric and geriatric abuse.
