Wood finishing refers to the process of refining or protecting a wooden surface, especially in the production of furniture where typically it represents between 5 and 30% of manufacturing costs.. Finishing is the final step of the manufacturing process that gives wood surfaces desirable characteristics, including enhanced appearance and increased resistance to moisture and other environmental ...

This site helps small shop workers understand the risks from fine dust exposure and how to effectively protect themselves and their families from airborne dust hazards. Fine dust is so extensively studied that researchers call it PM short for particle material. A Google search on PM Health Risks shows over 40 million references as to how unhealthy fine dust is.

The Merlin2 Premium Set has all the basic accessories you require for wood turning, wood carving, miniature woodworking and finish work. It is highly recommended for the making of things like spoons, small bowls, detailed facial and animal features. But we don't recommend using the Premium Set for carving huge free-form bowls, sculptures, totem poles or the like.

Plans, Drawings, Sketches (inches) Click on a drawing to view the letter-size (8½" x 11") drawing in "pdf" format. Requires the free Adobe Reader® 7.0, which can also be used for printing the drawing.. Drawing 1-- This drawing shows roughly what we try to accomplish. Unfortunately it contains a few minor errors, like the spacing between the slats of the headboard should all be equal.
