Laurent Elder Pan Asia Networking, IDRC Canada Laurent Elder leads IDRC's Pan Asia Networking (PAN) program, which studies the positive and negative impacts of the information society on Asian countries in order to help communities make the best use of information and communication technologies.

Using mobile phones to improve educational outcomes: An

Fuzzing or fuzz testing is an automated software testing technique that involves providing invalid, unexpected, or random data as inputs to a computer program. The program is then monitored for exceptions such as crashes, failing built-in code assertions, or potential memory leaks. Typically, fuzzers are used to test programs that take structured inputs

Fuzzing - Wikipedia

Methodology. This approach is far more successful with simple problems and in games, and is often resorted to when no apparent rule applies. This does not mean that the approach need be careless, for an individual can be methodical in manipulating the variables in an attempt to sort through possibilities that may result in success.
