

mass transfer operations absorption pdf

Mass transfer is the net movement of mass from one location, usually meaning stream, phase, fraction or component, to another. Mass transfer occurs in many processes, such as absorption, evaporation, drying, precipitation, membrane filtration, and distillation. Mass transfer is used by different scientific disciplines for different processes and mechanisms.

Mass transfer - Wikipedia

Koch Modular produces modular mass transfer systems for the separation, purification and reaction needs of the chemical process industry.

Modular Construction for Chemical Mass Transfer Systems

Unit Operations in Food Processing - R. L. Earle

The electron is a subatomic particle, symbol e^- or β^- , whose electric charge is negative one elementary charge. Electrons belong to the first generation of the lepton particle family, and are generally thought to be elementary particles because they have no known components or substructure. The electron has a mass that is approximately 1/1836 that of the proton.
