In linear algebra, the dual numbers extend the real numbers by adjoining one new element ϵ with the property $\epsilon^2 = 0$ (ϵ is nilpotent). The collection of dual numbers forms a particular two-dimensional commutative unital associative algebra over the real numbers. Every dual number has the form $z = a + b\epsilon$ where a and b are uniquely determined real numbers. The dual numbers can also be thought ...

Incubator The Standards Australia Incubator is a sandpit for playing with new ideas and testing concepts. It's a place for you to share your vision of how we could develop standards better and how they could add greater value to Australian society by being delivered in more user focused ways.

Standards Australia - Standard Organisation in Australia

The periodic table, or periodic table of elements, is a tabular arrangement of the chemical elements, ordered by their atomic number, electron configuration, and recurring chemical properties, whose structure shows periodic trends. Generally, within one row (period) the elements are metals to the left, and non-metals to the

right, with the elements having similar chemical behaviours placed in ...
