In a microwave beam directed at an angle into the sky, a small amount of the power will be randomly scattered as the beam passes through the troposphere. A sensitive receiver beyond the horizon with a high gain antenna focused on that area of the troposphere can pick up the signal.

An integrated circuit or monolithic integrated circuit (also referred to as an IC, a chip, or a microchip) is a set of electronic circuits on one small flat piece (or "chip") of semiconductor material, normally silicon. The integration of large numbers of tiny transistors into a small chip results in circuits that are orders of magnitude smaller, cheaper, and faster than those constructed of ...

Over its long production history a wide range of radar types and subtypes have been fitted to variants of the Sukhoi Flanker fighter. Whilst some observers like to generalise the term 'Flanker radar' it is not unlike saying 'Pentium PC' - the range of power aperture product performance seen across these radars is greater than in any other tier one combat aircraft.
