

object oriented simulation conference pdf

Object-oriented programming (OOP) is a programming paradigm based on the concept of "objects", which may contain data, in the form of fields, often known as attributes; and code, in the form of procedures, often known as methods. A feature of objects is that an object's procedures can access and often modify the data fields of the object with which they are associated (objects have a notion of ...

Object-oriented programming - Wikipedia

Characteristics. While Modelica resembles object-oriented programming languages, such as C++ or Java, it differs in two important respects. First, Modelica is a modeling language rather than a conventional programming language. Modelica classes are not compiled in the usual sense, but they are translated into objects which are then exercised by a simulation engine.

Authors: Yin Yan, Girish Gokul, Karthik Dantu, Steven Y. Ko, Lukasz Ziarek, and Jan Vitek. Abstract: Time predictability is difficult to achieve in the complex, layered execution environments that are common in modern embedded devices such as smartphones. We explore adopting the Android programming model for a range of embedded applications that extends beyond mobile devices, under the ...

Jan Vitek @ NEU

In this paper we show how to create a UVM testbench with interface connections that universally work in any design simulation context. A harness is a common solution for encapsulating interfaces, binding them to the DUT, and publishing virtual interface assignments.

Welcome to IEEE TENCON 2016! TENCON is a premier international technical conference of IEEE Region 10, which comprises 57 Sections, 6 Councils, 21 Subsections, 514 Chapters and 1159 Student Branches in the Asia Pacific region. The theme for TENCON 2016 is Technologies for Smart Nation. TENCON 2016 is expected to bring together researchers, educators, students, practitioners, technocrats and ...

IEEE TENCON 2016

Deriving meaning in a time of chaos: The intersection between chaos engineering and observability. Crystal Hirschorn discusses how organizations can benefit from combining established tech practices with incident planning, post-mortem-driven development, chaos engineering, and observability.
