Chapter 15: Animal responses 228 that are mainly myelinated, and so this area appears white. The brain can be considered to be a highly specialised extension of the spinal cord. Its structure is described in detail on pages 233â€”236.

### **Chapter 15**

Structure of the cell membrane. The cell membrane is a two-layered structure composed of lipids and proteins (see Figure 5-5). The two layers are lipids, and the proteins are embedded in them. Some of the proteins are on the outer surface of the double membrane, some are on the inner surface, and some are thought to extend through the membrane.
