Let PhenoLogix be an Extension of your Lab! We specialize in customized separations solutions based on your needs. Our experts take on projects involving; HPLC, UHPLC, GC, GC/MS, LC/MS/MS, SPE method development and optimization, as well as sample preparation, impurity isolations, chiral screening, and small to medium scale purifications.

### **Phenologix | Application Development**

Quality, safety and effectiveness are the most important attributes of pharmaceutical products. Therefore, the development of analytical methodology to quality control has a fundamental role since it provides an evaluation of the drug regarding its identity, strength, purity and stability during shelf life (Jain and Basniwal, 2013). High-performance liquid chromatography (HPLC) is the technique ...

Aim: Recombinant FGF21 analogs are under wide ranging investigations as a potential therapeutic agent for Type 2 diabetes, as well as other metabolic disorders. The endogenous FGF21 is often used as a surrogate pharmacodynamic(PD) biomarker to assess drug efficacy and safety. Results & methodology: Immunocapture was performed using a monoclonal antibody which had been generated to bind to ...

A stability-indicating method has been developed and validated for the quantitative determination of memantine hydrochloride and its nonchromophoric impurities in drug substance and drug product using gas chromatography coupled with flame ionization detector (GC-FID). The stability-indicating nature of the method has been proved by establishing peak purity and confirming the mass balance of ...

The recently emerged field of nanotechnology holds great promise for developing drug delivery systems with targeting and controlled-release characteristics for cancer treatment; there have been many new advances and innovations made in this field during the past decade. 1 A large proportion of chemotherapeutic drugs have low aqueous solubility, consequently requiring the use of specialized ...
