Software documentation is written text or illustration that accompanies computer software or is embedded in the source code. It either explains how it operates or how to use it, and may mean different things to people in different roles. Documentation is an important part of software engineering. Types of documentation include:

Uploading Documents to TeamBinder. Uploading documents is a critical part of project collaboration. Few collaboration systems have managed to move beyond making users login to the system and uploading one or more documents manually to complete the meta data before deciding where to put the document and to whom to distribute it.

Benefits of Web Based Document and Project Control System

Document management and real-time collaboration are built right into Revu. Studio Projects give your customers a single centralized location to store documents—even entire building projects—in the cloud. And Studio Sessions let project teams review, mark up, modify and update the same files at the same time. So partners worldwide can instantly connect on the same set of documents.
