

### **streams in the desert pdf**

A stream is a body of water with surface water flowing within the bed and banks of a channel. The stream encompasses surface and groundwater fluxes that respond to geological, geomorphological, hydrological and biotic controls.. Depending on its location or certain characteristics, a stream may be referred to by a variety of local or regional names.

### **Stream - Wikipedia**

A desert is a barren area of landscape where little precipitation occurs and consequently living conditions are hostile for plant and animal life. The lack of vegetation exposes the unprotected surface of the ground to the processes of denudation.About one third of the land surface of the world is arid or semi-arid. This includes much of the polar regions where little precipitation occurs and ...
