The Outcome Economy: How the Industrial Internet of Things

Define the term "outcome economy." Allan Alter: The outcome economy is a shift from competing by selling products and services to competing by selling measurable results important to the customer. It's an economy where buyers are looking to buy an outcome and the sellers are selling a promise of an outcome.

The outcome economy is upon us -- is your business ready?

"the emerging outcome economy in which digital businesses increasingly sell solutions and results rather than just products and services." "The outcome economy is defined by the ability of companies to

create value by delivering solutions to customers that in turn lead to quantifiable results.

The Outcome Economy –“ Jokull | Helge TennÃ

In the outcome economy phase, companies will shift from competing through selling products and services, to competing on delivering measurable results important to the customer. This is a much more challenging prospect.

A frequently discussed concept when we talk about monetization of IoT over the past few years is the emergence of the 'Outcome Economy'. The Outcome Economy represents a shift from competing by simply selling features and benefits of products and services, to competing by selling measurable results relevant to the customer.
