Repellent products that do not contain DEET are not likely to offer the same degree of protection from mosquito bites as products containing DEET. Non-DEET repellents

Questions and Answers Insect Repellent Use and Safety

Essential oils in these plants act as nature's bug repellent. Insects tend to avoid them. You can even use some of these plants to make your own natural bug repellent. But know that simply including insect-repelling plants in your landscape will not in itself ensure your garden is insect free.

12 plants that repel unwanted insects

DEET, registered for public use in 1957, is the most common mosquito and tick repellent. It is rated as very effective in repelling a wide range of mosquitoes, ticks and other bugs.

EWG's 2018 Guide to Bug Repellents : Repellent Chemicals

In addition, the use of other natural products in the mixture, such as vanillin, could increase the protection time, potentiating the repellent effect of some essential oils.

(PDF) Repellent activity of essential oils: A review

Published data indicate that repellent efficacy and duration of protection vary considerably among products and among mosquito and tick species. Product efficacy and duration of protection are also markedly affected by ambient temperature, level of activity, amount of perspiration, exposure to water, abrasive removal, and other factors.
