RNA interference (RNAi) is a biological process in which RNA molecules inhibit gene expression or translation, by neutralizing targeted mRNA molecules. Historically, RNAi was known by other names, including co-suppression, post-transcriptional gene silencing (PTGS), and quelling. The detailed study of each of these seemingly different processes, elucidated that the identity of these phenomena ...

### **RNA interference - Wikipedia**

Small interfering RNA (siRNA), sometimes known as short interfering RNA or silencing RNA, is a class of double-stranded RNA molecules, 20-25 base pairs in length, similar to miRNA, and operating within the RNA interference (RNAi) pathway. It interferes with the expression of specific genes with complementary nucleotide sequences by degrading mRNA after transcription, preventing translation

Investment Case. Silence is the only listed RNAi player in Europe and a pioneer in this technology. Through the efforts of our skilled scientists over the years we have established a robust platform that allows us to effectively trigger RNAi in specific cell types.

Application Penicillin G is a narrow spectrum antibiotic derived from *Streptococcus pneumoniae*. It has been used to study the diagnostic and therapeutic implications of gentamicin-resistant *Enterococcus faecalis* sequence type 6 with reduced penicillin susceptibility and in cell culture both alone and combined with streptomycin and other antibiotics.

Abstract. Nanomaterials offer new opportunities for cancer diagnosis and treatment. Multifunctional nanoparticles harboring various functions including targeting, imaging, therapy, and etc have been intensively

studied aiming to overcome limitations associated with conventional cancer diagnosis and therapy.

Die RNA-Interferenz (kurz RNAi oder auch RNA-Silencing) ist ein natürllicher Mechanismus in den Zellen von Lebewesen mit einem Zellkern (), welcher der zielgerichteten Abschaltung von Genen dient. Sie ist ein Spezialfall der Gen-Stilllegung. Die RNA-Interferenz beruht auf einer Wechselwirkung kurzer Stücke von Ribonukleinsäure (RNA) mit der Erbinformation-Übertragenden mRNA unter Beteiligung ...

### RNA-Interferenz â€“ Biologie

After being the industryâ€™s graveyard for over 20 years, there is finally room for optimism in CNS (central nervous system) disorders. The void created in the field is now being filled by small companies which are using novel therapeutic (gene therapy, antisense, antibodies) and development (genetic validation in humans, biomarkers for patient selection) approaches.
