Membrane technology covers all engineering approaches for the transport of substances between two fractions with the help of permeable membranes. In general, mechanical separation processes for separating gaseous or liquid streams use membrane technology.

An air separation plant separates atmospheric air into its primary components, typically nitrogen and oxygen, and sometimes also argon and other rare inert gases.. The most common method for air separation is fractional distillation. Cryogenic air separation units (ASUs) are built to provide nitrogen or oxygen and often co-produce argon.

Industrial Gases Production, Equipment Supply and Services. Universal Industrial Gases (UIG) is a designer, manufacturer, supplier, installer and operator of industrial gases production and supply systems. Its product portfolio includes air separation plants, cryogenic oxygen plants, cryogenic nitrogen plants, liquefiers, and compressed dry air systems.

Polymeric gas-separation membranes were commercialized 30 years ago. The interest on these systems is increasing because of the simplicity of concept and low-energy consumption. In the refinery, gas separation is needed in many processes such as natural gas treatment, carbon dioxide capture, hydrogen purification, and hydrocarbons separations.

Hyperbranched polyimide-silica hybrids (HBPI-silica HBDs) and hyperbranched polyimide-silica composites (HBPI-silica CPTs) were prepared, and their general and gas transport properties were investigated to clarify the effect of silica sources and preparation methods. HBPI-silica HBDs and HBPI-silica CPTs were synthesized by two-step polymerization of A2 + B3 monomer system via ...

Principles on which OSI model was designed: A layer should be created where different level of abstraction is needed. Each layer should perform a well defined function. The function of each layer should be chosen according to the internationally standardized protocols. The number of layers should be large enough that distinct functions should not be put in the same layer and small
